

FUTURE MOBILITY & PARTS EXHIBITION

November 26 - 28 -, 2025

The Hub of Technologies Driving Tomorrow, Future Mobility & Parts Exhibition

The Future Mobility & Parts Exhibition (FMP) is a global exhibition that shows innovations in autonomous driving, electrification, urban air mobility, marine transport, and robots. It supports parts manufacturers in expanding their markets and contributes to regional industry and economic growth.

Discover leading companies and cutting-edge technologies shaping the future of mobility parts — and explore the latest trends in the global mobility market.

Event Overview

Title Future Mobility & Parts Exhibition

Period November 26 (Wed) – 28 (Fri), 2025

Venue Changwon Exhibition Convention Center (CECO)

Scale

Hosted by

Organized by

80 companies, 150 booths

MS Global ncompany

Main Program

Global **Exhibition**

A business-oriented Future Mobility & Parts Expo, featuring 80 companies and 150 booths from Korea and abroad.

Business Matching Session

Customized matchmaking sessions between automakers and parts manufacturers for supply chain development and market expansion.

Exhibited Items

Powertrain (motors), inverters, energy storage systems (batteries, hydrogen, etc.), axles, brakes, wheels, body components, interior components, tires, and other general parts

Connected services, navigation systems, autonomous driving, cameras, radar, LiDAR, etc.

Side Events

Sharing the latest trends in AI technologies and up-to-date insights on both global and domestic developments.

Experience Events

Hands-on experiences including mobility tech showcases and test drives.

Education program

Autonomous Vehicle Challenge for students and professionals

Equipment, production facilities, maintenance tools, molds, etc.

Future mobility-related materials and chemicals, lightweight components, advanced substrates

After-sales service, tuning, aftermarket and consumable parts, mobility-themed lifestyle products

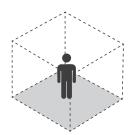

Drones, robots, eco-friendly vehicles, heavy machinery, commercial and agricultural vehicles—encompassing all aspects of next-generation mobility
